

## Mobile Phone Software Installation – pre Symbian 9

Each mobile phone is provided with a software package and a USB cable to download software. You can also use a Bluetooth connection if preferred. Download the package you require from the CodeFactory website at <http://www.codefactory.es>

Mobile Accessibility - download Fonix DECTalk UK English  
Mobile Magnifier - download Mobile Magnifier English  
Mobile Speak - download Fonix DECTalk UK English – you can also download the Loquendo Simon or Loquendo Kate version, but this will only run on phones with larger memory - Nokia 6630, 6680, 6682, N70 and N90.

Please make sure you download the correct version for the phone, there are different versions for different phones  
Save the downloaded file into a temporary folder on the hard drive of the PC – any folder can be used. Unzip the file, and you will find the application and some other files such as the user manual.

The process for installing applications is different for each make/model of phone, so refer to the instructions supplied with the phone and software package. Using the phone software package, download the chosen application to the phone in the order shown. The files needed for each package are as follows: -

Mobile Accessibility - UKEnglish\_Fonix.SIS and MAccess\_fonix\_english.SIS  
Mobile Magnifier - mmag\_english.sis  
Mobile Speak - UKEnglish\_Fonix.SIS and Speak\_fonix\_english\_uk.SIS

When the software is run, it will prompt with a 13 digit serial number, please call us on 0870 321 7091 and we can generate a free 30 trial licence. For further information, please call the same number.
